# 1. Preface

Dear Sir or Madam,

With this trade fair calendar, we aim to guide you through the host of mechanical engineering-related trade fairs being held all over the world in 2020. As our collaboration with the Association of the German Trade Fair Industry (AUMA) gives us access to a comprehensive database, we can give you all the dates that had been announced by August 2019.

On the next pages you will find the preliminary foreign trade fair program for the Federal Republic of Germany and the special trade fair program focusing on renewable energies and energy efficiency, as well as further mechanical engineering-related trade fairs and events. Overviews arranged geographically and chronologically make the calendar easier to use. You will also find contact addresses for involvements in trade fairs abroad by German federal states.

In addition to the PDF version, this VDMA Trade Fair Calendar is available in electronic form on the VDMA website. It is based on VDMA structures, making it even easier for you to find the trade fairs relevant to you. You will find the database at

**[www.vdma.org/en/messeservice\\_deutschland](http://www.vdma.org/en/messeservice_deutschland)** or  
**[www.vdma.org/en/messeservice\\_weltweit](http://www.vdma.org/en/messeservice_weltweit)**.

As in previous years, the Federal Government's program of trade fairs abroad provides very positive conditions. As early as spring 2019, the Federal Ministry for Economic Affairs and Energy (BMWi) issued calls for tender for 73 joint participation projects at trade fairs worldwide recommended by VDMA. Further trade fairs will be added in the fall, bringing the expected total of mechanical engineering-related trade fairs to more than 80 once again in 2020.

You can find information about the latest developments and projects in the foreign trade fair program and on other key topics related to trade fairs in the newsletters of the trade associations and on our website ([ausseiwirtschaft.vdma.org/en/messeinformationen](http://ausseiwirtschaft.vdma.org/en/messeinformationen)).

VDMA Trade Fairs and Symposia as well as the industry-specific VDMA trade associations will be happy to help with any questions on mechanical engineering-related trade fairs worldwide.

Yours sincerely,

**Thilo Brodtmann**  
Executive Director

## 2. Useful tips on using the trade fair calendar

This trade fair calendar is intended to help interested member companies with planning and decision-making in relation to the range of trade fairs held worldwide. The information in the trade fair calendar should not be seen as a recommendation to take part in or attend an event – nor does it make any claim to completeness. No liability is accepted for the information provided.

Choosing a suitable event takes careful consideration. VDMA Trade Fairs and Symposia and the industry-specific VDMA trade associations help and support interested member companies. This trade fair calendar has been compiled in consultation with the VDMA trade associations that are particularly active in the business of trade fairs abroad.

It contains mechanical engineering-related trade fairs and technology symposia

- that are among the focus events of the individual segments of mechanical engineering worldwide,
- that are established events in the respective market,
- in which the Federal Government is involved (largely) on behalf of VDMA, and
- about which there is detailed information that, in the view of VDMA, indicates that the event has a sufficient minimum size and level of internationality.

Member companies can also receive this **trade fair calendar** by **email** free of charge.

Email: [christine.doehler@vdma.org](mailto:christine.doehler@vdma.org).

It can also be searched electronically in the trade fair database at

[www.vdma.org/en/messeservice\\_deutschland](http://www.vdma.org/en/messeservice_deutschland) or

[www.vdma.org/en/messeservice\\_weltweit](http://www.vdma.org/en/messeservice_weltweit)

Some **VDMA trade associations** have their own trade fair calendars or lists, which they offer to their members. These trade associations include the following:

- Power Transmission Engineering and Fluid Power
- Valves
- Construction Equipment and Plant Engineering
- Process Technology Forum
- Environmental Technology Forum
- Woodworking Machinery
- Plastics and Rubber Machinery
- Marine Equipment and Systems
- Metallurgy
- Mining
- Organic and Printed Electronics Association
- Textile Care, Fabric and Leather Technologies
- Textile Machinery
- Process Plant and Equipment
- Machine Tools

## 7. Foreign trade fair participations by federal states in 2020

In addition to the Federal Government's involvement in trade fairs abroad, individual federal states also offer support for companies interested in exporting. VDMA is extensively involved in the selection of these funding measures through its state associations. To be eligible for funding, the company must be based in the federal state in question. Collaborations between multiple states are increasingly common. For further information, please contact the **VDMA state association** responsible for your location or use the contact addresses for the individual states as listed below:
